

Please consider that my station Air1 Radio serves my family in providing a positive alternative to what is available currently on the air. This station effects this community in a clear and positive manner and truly provides a positive service. This is the only station that is listen too in my office and to change the way Air1 is broadcast would be a disservice to my community. Air1 Radio provides the public with a positive, clean listening alternative to radio, that is not presented by other radio stations. We need to continue broadcasting AIR1 as always and not displace this station by broadcasting another program that continually fills the air with negative waves.
